# Monitor or Change Student Test Status

Search

You can monitor student tests to track each student's testing progress during a session.

You can monitor tests for all students, *except those in **Ready** status*. Test and item progress can show:

- Each section
- Sequence
- Item (marked *Visited*, *Answered*, or *Unanswered*)
- Item receipt information from Pearson servers
- Student response (only with specific permissions)

To read a description of what each student test status represents, refer to **Student Test Status**.

### Prerequisites

You can monitor test status only after the test session has started and before the test session has stopped.

## What's Next?

At times, a student's test status requires you to perform a task. ⓘ *Tasks available vary by program.*

- If a student exits a test before finishing the test, and you want the student to continue the same test, see Resume a Test.
- If a student has finished or will not continue a test, but the test was not automatically marked **Complete**, see Mark Student Tests Complete.
- In the rare case that the system encounters issues while processing a test, see Undo Student Test Submission to resubmit and reprocess the test.
