

_PAsup_limited_feature

Some features are only available to some user accounts. Each user account has a user role(s) and permissions associated with it. These permissions control the data the user can view and actions the user can perform. If you do not see a specific feature, your account is not configured to access it. See [Manage Users](#) for more information.

Your testing program will provide information identifying user roles and what each is permitted to do and see.
