Search

You can choose to precache content by test or session.

▼ [Recommended browser list for precaching...](#)

Browsers	Operating Systems	Precache using the Java applet	Precache without the Java applet
IE 11	Windows 7	Yes	With this browser, you cannot precache without using the Java applet.
Firefox 50*	Windows 7	Yes	With this browser, you cannot precache without using the Java applet.
Chrome 56	Windows 7	With this browser, you cannot precache using the Java applet.	Yes
Safari 9	MAC OS 10.9	With this browser, you cannot precache using the Java applet.	Yes

* You cannot precache with Firefox 52, as Java plugin is not supported on Firefox 52.

Depending on your browser, you can precache content with or without using the ProctorCache Java applet.

Prerequisites

If you cache content by sessions, you must perform the following task only after you create a test session(s).

You must either disable pop-up blocker or add an exception to allow pop-ups from your precaching URL.

▼ You can add an exception for the following browsers...

▼ Firefox 50

1. Click **Firefox**, and select **Preferences...**
2. Click **Content**, and select the **Block pop-up windows** checkbox. Then, click **Exceptions.** 
3. Your secure test website should appear in the **Site** column, and **Allow** should appear in the **Status** column. 

1. If you do not see your secure test website in the **Site** column with an **Allow** status, type your secure test website in to the **Address of website** field, and click **Allow**.

4. Click **Save Changes**.

▼ IE 11

1. Click **Tools**, and select **Pop-Up Blocker**. Pop up blocker is turned on.

2. Select **Pop-Up Blocker Settings**, and add your secure website into **Exceptions**. 

▼ Chrome 56

1. Click **Settings**, and click **Show Advanced Settings**. Click **Privacy**.
2. Click **Content Settings...** under **Pop-ups**, select **Do not allow any site to show pop-ups**.
3. Click **Manage exceptions..** and add your secure website.
4. Click **Done**. 

▼ Safari 9

1. From Safari menu, click **Preferences** go to **Security**. Pop-up blocker is turned on. Deselect **Block pop-up windows** to allow pop-ups. 

Step-by-Step

Read It

Cache Content by Test

(Click  to view image)

1. From **Setup**, select **Precache by Test**. 
2. Click the checkbox to select one or more tests from the list. 

Cache Content by Sessions

(Click  to view image)

1. From **Testing**, select **Sessions**. 
2. Type a session name into the search field, and click **Search**. 
3. Click the checkbox next to the session. 
4. Click **Select Task**, select **Precaching Test Content**, and click **Start**. 
5. Click **Precache**. 

If content is not appearing when precaching and there are no students in the session, add students to the test session and try again.

3. Select one

Precache

Server from the list.

4. Click **Precache**.

5. A popup message displays. Click **Precache** again to start precaching. 

The TestNav status window reflects the precaching status.

6. Close the pop-up window after processing completes. 

Precaching starts. 

An information page displays the caching in progress and the parameters.  At the same time, the ProctorCache application opens. From that application, you can view caching progress.

6. After processing is complete, close the pop-up window. 

Effects

▼ You can view available cached tests' status...

1. From **Testing**, select **Sessions**.
2. Type a session name into the search field, and click **Search**.
3. Click the checkbox next to the session.
4. Click **Select Tasks**, click **Precaching Test Content**, and click **Start**.
5. Click **View Status** to open ProctorCache in a new window.
6. From the application, you can refresh downloaded test content, reload the content, or purge content from the cache. *See Set Up and Use ProctorCache for directions.*
