TestNav 8 Online Support

TestNav 8 Online Support provides system requirements, instructions for setup, troubleshooting steps, and information on features and demos.

The Getting Started checklist below outlines the high-level process for setting up your TestNav testing environment. Click the links within the steps for detailed instructions. You can also download a printable PDF of this page by clicking **Tools** > **Export to PDF**.

The user guide was created for online use. For the best reading experience and the most up-todate information, we recommend using the online version.

If you are experiencing an issue with TestNav, locate your error code and SRF and log files before you contact Pearson Support.

Getting Started

- 1. Review TestNav System Requirements and firewall/port settings for testing devices.
- 2. If using ProctorCache, review ProctorCache System Requirements, and then install ProctorCache on designated proctor caching computers.
 - 1. Pre-cache test content through your assessment management system. *Your program should provide instructions for pre-caching test content.*
- 3. Complete infrastructure trial in each testing lab using a practice test. *Your program should provide instructions for setting up a practice test through your assessment management system.*
