

_TN_DefaultSFTPRecommendInstallable

TestNav has a default primary SRF save location for all computers and devices. Pearson strongly recommends setting a secondary save location for SRFs as a backup. For detailed information on saved response files (SRFs) and log files, see [Understand SRFs and Log Files for Installable TestNav](#) .

SFTP configuration is not supported by all assessment management systems. Consult your assessment management system user guide to determine whether the SFTP option is available.
