

Features and Demos

TestNav 8 current capabilities include a wide-range of tools and features. TestNav is QTI-compliant and includes a wealth of testing tools, as well as built-in Early Warning System triggers and safeguards for student testing and options for accessibility.

This section describes the user interface, menus and functions, and options related to online testing sessions.

Test administrators can access information throughout this section, as well as support documentation in [Understand the System Layout](#), [Troubleshooting](#), and [Resuming a Test Session](#).

You can navigate support pages in order by task or quickly search for your topic in the search box at the top-right. You can also disclose sections within a page, as needed.

If your search results include a page with expandable text, expand all, and then search again.
