

Monitor or Change Student Test Status

On this page:

[General Information](#) [Prerequisites](#) [Instructions](#) [What's Next?](#)

Search

You can monitor student tests to track each student's testing progress during a session.

You can monitor tests for all students, *except those in **Ready** status*. Test and item progress can show:

- Each section
- Sequence
- Item (marked *Visited*, *Answered*, or *Unanswered*)
- Item receipt information from Pearson servers
- Student response (only with specific permissions)

To read a description of what each student test status represents, refer to **Student Test Status**.

Prerequisites

You can monitor test status only after the test session has started and before the test session has stopped.

Step-by-Step

Read It

(Click to view image)

1. From **Testing**, go to **Students in Sessions**. 
2. Click **Add a Session**. 
3. Type a session name into the search field, and click the checkbox next to the session. 

4. Click Add Selected.

1. View test session details:

View a Student's Testing Status	View the Student Test Status Dashboard												
<p>a. Click a student test status. </p> <p>b. Review the student test item progress and other test-related details. </p>	<p>a. Click the pop-out button  above the Session progress bar.  The dashboard Sessions with strict battery tests have a separate pop-out button for each u <i>only available when the session is In Progress.</i></p> <p>b. DPTLNAMAAAAE, DPTFNAMAAAAE E (203370000005)	Ready												

What's Next?

At times, a student's test status requires you to perform a task.  *Tasks available vary by program.*

- If a student exits a test before finishing the test, and you want the student to continue the same test, see [Resume a Test](#).
- If a student has finished or will not continue a test, but the test was not automatically marked **Complete**, see [Mark Student Tests Complete](#).
- In the rare case that the system encounters issues while processing a test, see [Undo Student Test Submission](#) to resubmit and reprocess the test.
