

# System Requirements

You can use the requirements on this page to set up PearsonAccess<sup>next</sup>. Refer to this page to make sure you are using the most up-to-date version of PearsonAccess<sup>next</sup>. Pearson continually monitors and evaluates the recommended and supported software requirements. As vendors release newer versions of their products, we update the recommended operating systems and browsers accordingly.

*This document does NOT contain requirements for TestNav online test delivery. For TestNav hardware and software requirements, see [TestNav Online Support](#).*

---

## Minimum Requirements

Browsers	Operating Systems
IE 11	Windows: 7 (with Service Pack 1)
Safari 9	OS X/macOS: 10.9, 10.10, 10.11, 10.12
Chrome 49	Windows: 7
	OS X/macOS: 10.9, 10.10, 10.11, 10.12
Firefox 45	Windows: 7
	OS X/macOS: 10.9, 10.10, 10.11, 10.12

*The current release version for both Firefox and Chrome at the time of our software's release are tested and supported. Newer release versions of Firefox and Chrome may work; however, Pearson does not recommend software or technology changes during an online test administration.*

## Intermediate Network Devices

This section contains guidelines for schools using firewalls and proxy servers while accessing only the PearsonAccess<sup>next</sup> domain.

### Firewall

Customers using a firewall to limit Internet access must allow the following destination/protocol/port combinations:

\*.pearsonaccessnext.com:  
80

\*.pearsonaccessnext.com:  
443

### Proxy Servers /Content Filtering

Customers using proxy servers or Internet content filtering software must allow the following URLs:

\*.pearsonaccessnext.com:  
80

\*.pearsonaccessnext.com:  
443

---

## Email Domain Name

When accessing PearsonAccess<sup>next</sup>, school and district email systems must be configured to accept emails from the following address domain:

@support.pearson.com
