

App Check Error Messages

App Check displays error messages if any of the following scenarios occur:

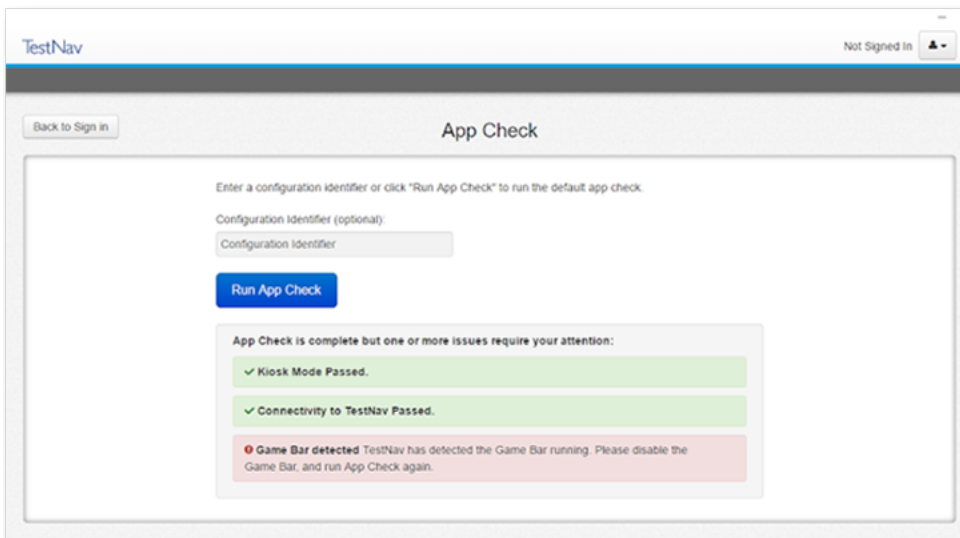

- The device is not connecting to TestNav. To resolve this issue, refer to [TestNav System Requirements](#) and [Set up and Use TestNav](#) to confirm settings on each supported device.

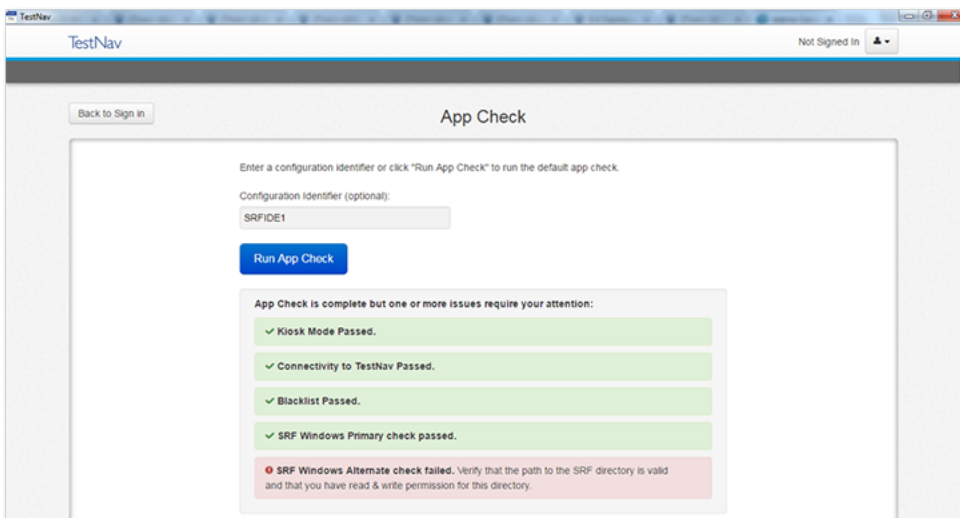

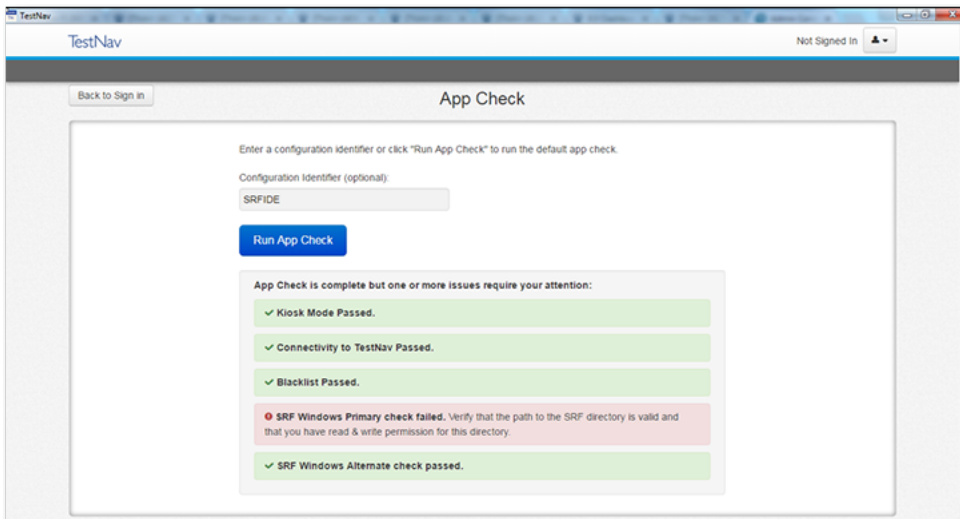

- The device is not configured to start TestNav in Kiosk Mode. To resolve this issue, see [Set up and Use TestNav](#) to confirm settings on each supported device.

- Windows Game Bar is running. To resolve this issue, refer to the [Microsoft support site](#), and search for "disable Game Bar."

- The primary OR secondary saved response file (SRF) path is invalid. To resolve this issue, sign in to PearsonAccess^{Next}, and update the TestNav Configuration Task.

- If configured, App Check can also verify connectivity to ProctorCache. To resolve this issue, refer to the [ProctorCache Requirements and Set Up and Use ProctorCache](#) and confirm settings.
