

# Manage Participation in Test Administrations

You must indicate an organization's participation in an administration(s) before it can take part in an administration.

When you mark your organization as **Participating**, you can create groups in that organization, assign tests to those groups, and assign students in those groups. You cannot participate in a test administration unless you mark this.

When you mark **Participation Entry Complete**, this indicates both the organization's intent to participate in the test administration and that the organization has finalized any necessary participation data.

If available, you can also select/type administration-specific details (for example, shipping times, school type, start, and close dates, etc.).

 Details available vary by program.

---

## Prerequisites

Pearson recommends that you create an organization and manage its test administration participation at the same time.

You should find it in unregistered organizations. To do so, change the **Find Organizations** setting to ignore participation in your currently selected administration.

---

## Step-by-Step

1. From **Setup**, click **Organizations**.

2. Type the organization in the search field, and click **Search**.

3. Click **Select Tasks**, select **Manage Participation**, and click **Start**.

4. Click the checkbox next to **Participating** or **Participation Entry Complete**.
