

_TN_AppCheck_Install_iosAndChrome

To run App Check:

1. Click or tap the appropriate icon for your test from the home page to go to the **Sign In** page.
2. Click or tap the user drop-down menu, and select **App Check**.

App Check (without optional Configuration Identifier)

On the **App Check** page:

1. Leave the configuration identifier field blank.
2. Click **Run App Check**.

You see green checkboxes for Kiosk Mode Readiness and connectivity to TestNav, if the system passes. *If one of these fails, you will see a Fail message and must check your connection and settings before running App Check again.*

App Check (with optional Configuration Identifier)

If you have obtained a Configuration Identifier from your assessment management system:

1. Enter it in the **Configuration Identifier** field.

The configuration identifier allows TestNav to also check connection to ProctorCache computers.

2. Click **Run App Check**.
3. If ProctorCache connectivity fails, TestNav provides information for possible resolutions. Use this information to troubleshoot, and run App Check again.

Run Network Check

On the App Check page,

1. Click **Run Network Check**.

App Check

Enter a configuration identifier or click "Run App Check" to run the default app check.

Configuration Identifier (optional):

Configuration Identifier

Run App Check Run Network Check

2. Estimate the number of devices that will connect to your network during testing, and enter it into the **Number of devices** field.

Network Check X Cancel

Estimate a school or test center's capacity to conduct online testing.

Number of devices

100

Start Diagnostics Test

3. Click **Start Diagnostics Test**.
4. See your **Test Results** under **Network Diagnostics** to determine whether your network has sufficient bandwidth to test without ProctorCache.
