Import or Export TestNav Configurations

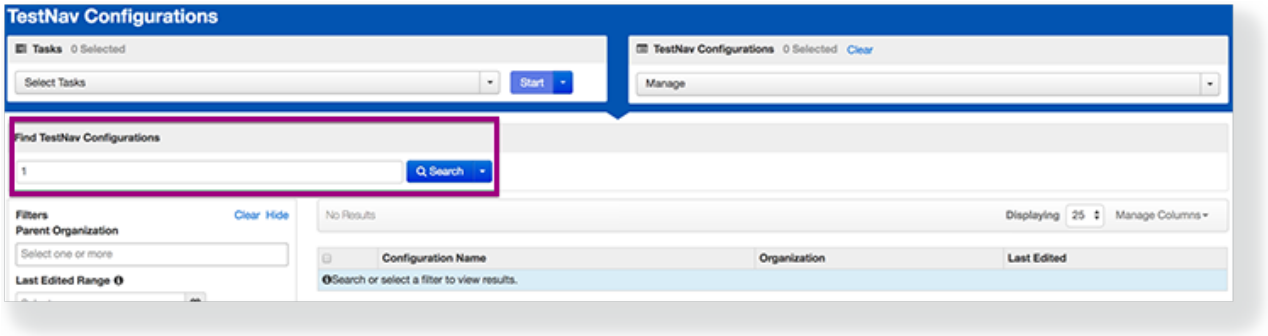

You can import and export TestNav configurations to easily set up configurations in the system.

Step-by-Step

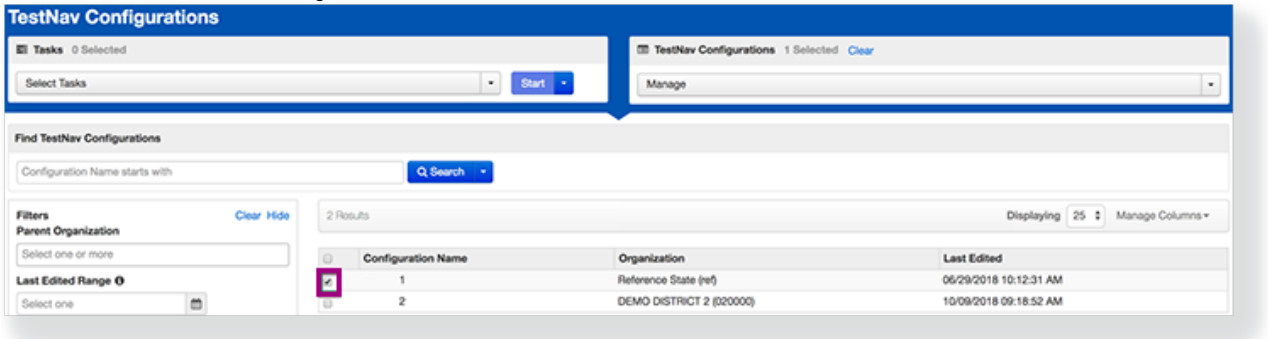

1. From **Setup**, select **TestNav Configurations.**

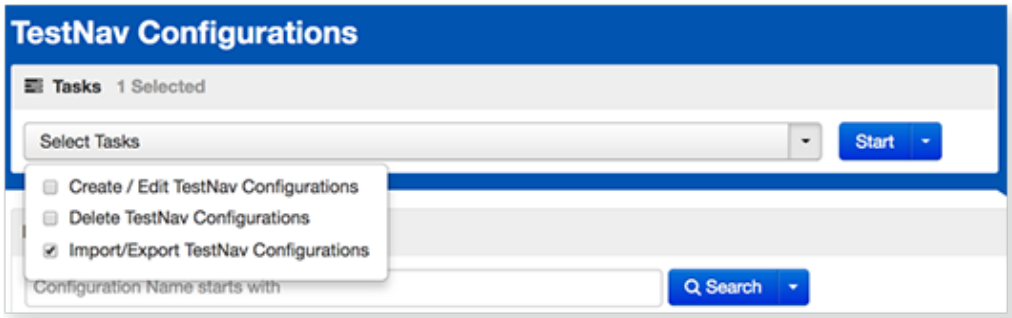

2. Type a configuration name into the search field, and click **Search.**

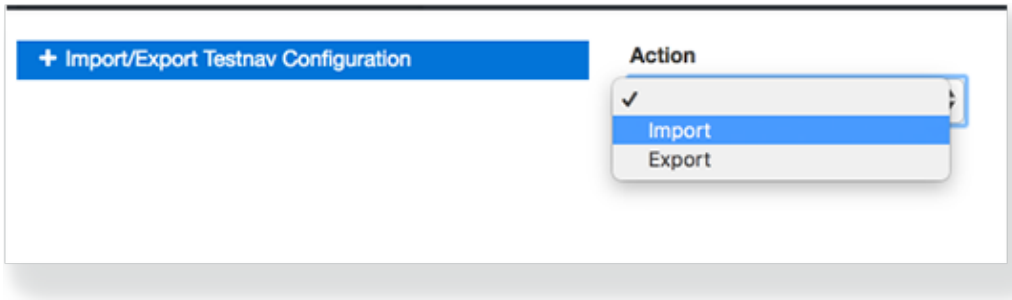

3. Click the checkbox next to the configuration.

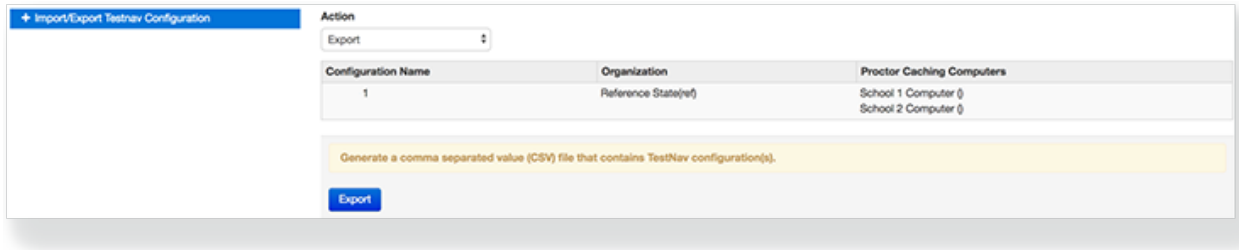

4. Click **Select Tasks**, select **Import / Export TestNav Configurations**, and click **Start**.

5. Click the **Action** dropdown, and select **Import** or **Export**.

6. Click **Import** or **Export,** as appropriate.

To avoid a possible timeout, Pearson recommends that you do not import/export over 300 TestNav configurations at a time.
