

Precache Test Content

You can choose to precache content by test or session.

- Recommended browser list for precaching...

Browsers	Operating Systems	Precache using the Java applet	Precache without the Java applet
Firefox*	Windows 10	Yes	With this browser, you cannot precache without using the Java applet.
Chrome	Windows 10	With this browser, you cannot precache using the Java applet.	Yes

* You cannot precache with Firefox 52, as Java plugin is not supported on Firefox 52.

Depending on your browser, you can precache content with or without using the ProctorCache Java applet.

Prerequisites

If you cache content by sessions, you must perform the following task only after you create a test session(s).

You must either disable pop-up blocker or add an exception to allow pop-ups from your precaching URL.

- You can add an exception for the following browsers...

ProctorCache sends the precaching command from your browser/PAN window to the ProctorCache device over HTTP. This command does not leave your network to travel over the internet. Browsers require that you confirm any communication over HTTP; therefore, the behavior is expected. Users can revert these **Permissions** to the **Block** setting after precaching is completed.

1. From PAN window, click the **Shield** icon in the upper-left corner of Firefox (left of the URL bar).

The screenshot shows a close-up of the Firefox address bar. On the left side, there is a shield icon with a lock symbol inside it, which is highlighted by a red square box. To the right of the shield icon, the text 'https://download.mozilla.org/' is visible. The address bar has a dark blue background.

2. Click **Protection Settings**.

3. Click **Privacy & Security** and scroll to **Permissions**.

4. Use one of the two methods below to enable pop-ups for PAN.
 - a. Uncheck the **Block Pop-up windows** checkbox to allow pop-ups from all websites, OR
 - b. Click **Exceptions**, add your PAN web address, and click **Allow** > **Save Changes**.

5. Close the **Settings** tab and return to PAN.

1. From PAN window, click the lock icon in the upper-left corner of Edge (left of the URL bar), and click on **Permissions for this site**.

2. Scroll to **Pop-ups and redirects**, click the dropdown and select **Allow**.
3. Scroll to **Insecure content** and select **Allow**.

4. Close **Settings** tab and return to PAN.

1. From PAN window, click the lock icon in the upper-left corner of Chrome (left of the URL bar), and click **Site Settings**.

2. Under **Security and Privacy > Permissions > Notifications**, click the dropdown and select **Allow**.
3. Scroll to **Pop-ups and redirects** and select **Allow**.

4. Scroll to **Insecure content** and select **Allow**.

5. Close Settings tab and return to PAN.

Safari does not currently support ProctorCache.

Step-by-Step

Cache Content by Test

1. From **Setup**, select **Precache by Test**.

2. Click the checkbox to select one or more tests from the list.

Precache By Test	
Organization	Test (select one or more)
Demo (demo)	<input type="checkbox"/> Demo Online Test <input checked="" type="checkbox"/> English <input type="checkbox"/> History

3. Select one **Precache Server** from the list.
4. Click **Precache**.
5. A popup message displays. Click **Precache** again to start precaching.

Precaching Computer: test @ 10.25.180.144.4480

Number of forms: 4
Total number of content elements: 115
Size: 1,018 KB

Click below to start the caching process

Precache

Processing complete.

6. Dependent upon your browser security settings, a second popup message may display. Agree to any necessary prompts to continue processing.
 - For example, when using Chrome, click **Send anyway**.

7. The TestNav status tab/window reflects the precaching status.

i If no precaching is reflected, return to the popup message from step 5, and click **Precache** once again focusing on any security popups.

The screenshot shows the TEST NAV ProctorCache interface. At the top, there are tabs for 'Tests', 'Clients', and 'Help'. Below the header, there are buttons for 'Refresh', 'Reload', and 'Purge', along with a search bar and a 'Clear' button. The main content is a table with the following columns: TEST, FORM, STATUS, ENTRIES, and CACHE DATE. The table lists various tests such as 'Geometry - Unit 2', 'Grade 3 Mathematics - Unit 1', 'Algebra II - Unit 1', and 'Geometry - Unit 3'. Each row includes a checkbox, a test name, a form ID, a status indicator (green circle with 'OK'), the number of entries, and the cache date and time (May 12, 2017, 10:29 AM).

TEST	FORM	STATUS	ENTRIES	CACHE DATE
<input type="checkbox"/> Geometry - Unit 2	Geometry - Unit 2 - 16G0MSPOE02010277	OK	36	May 12, 2017 10:29 AM

- Close the pop-up window after processing completes.

Effects

- From **Testing**, select **Sessions**.
- Type a session name into the search field, and click **Search**.
- Click the checkbox next to the session.
- Click **Select Tasks**, click **Precaching Test Content**, and click **Start**.
- Click **View Status** to open ProctorCache in a new window.
- From the application, you can refresh downloaded test content, reload the content, or purge content from the cache. See [Set Up and Use ProctorCache](#) for directions.
